

Foundations in Play Therapy 103

This training completes our Foundations series (prerequisite or prior approval needed). Participants have the opportunity to demonstrate their nondirective play therapy skills by having a hands on experience through a parent consultation and play therapy practicum experience. Participants will engage in group supervision and review their play therapy skills and techniques. Don't miss the unique opportunity to grow as a therapist utilizing play therapy techniques!

Objectives

Understand and demonstrate the importance of parent consultations in the play therapy process.

Demonstrate effective play therapy techniques.

Increase your knowledge of non direct play therapy and provided with supervision on play therapy skills.
